Election/Restrictions

1. Claims 1-21 are presented for examination.
2. The inventions are distinct, each from the other because of the following reasons:

Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claim 1-6, drawn to a device on a collaborative communications network, classified in class 705, subclass 1.
 - II. Claims 7, 9-14, 17 and 20-21, drawn to packet formatting and transmission of information, classified in class 709, subclass 227.
 - III. Claims 8, 15-16 and 18-19, drawn to a method of managing endpoints in a distributed network, classified in class 713, subclass 150+ or 182+.
3. The inventions are distinct, each from the other because:
Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from

Art Unit: 2154

each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as establishing a communication session for Internet connection. See MPEP 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as establishing secure Internet connection and authentication. See MPEP 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Richard Burgujian on July 21, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
